

Hodgson Houses

Removal Notice of Our New York Salesrooms

◆
Our large and spacious showrooms are now at 730 Fifth Ave., Corner of 57th Street.

Here you will find a unique display — a full sized cottage — nine large rooms completely furnished in various periods, Modernistic, Colonial, French Provincial, etc.

You will also find full sized samples of our various play houses, tool houses, pet stock houses, dog kennels, greenhouses, garden furniture, bird houses, etc.

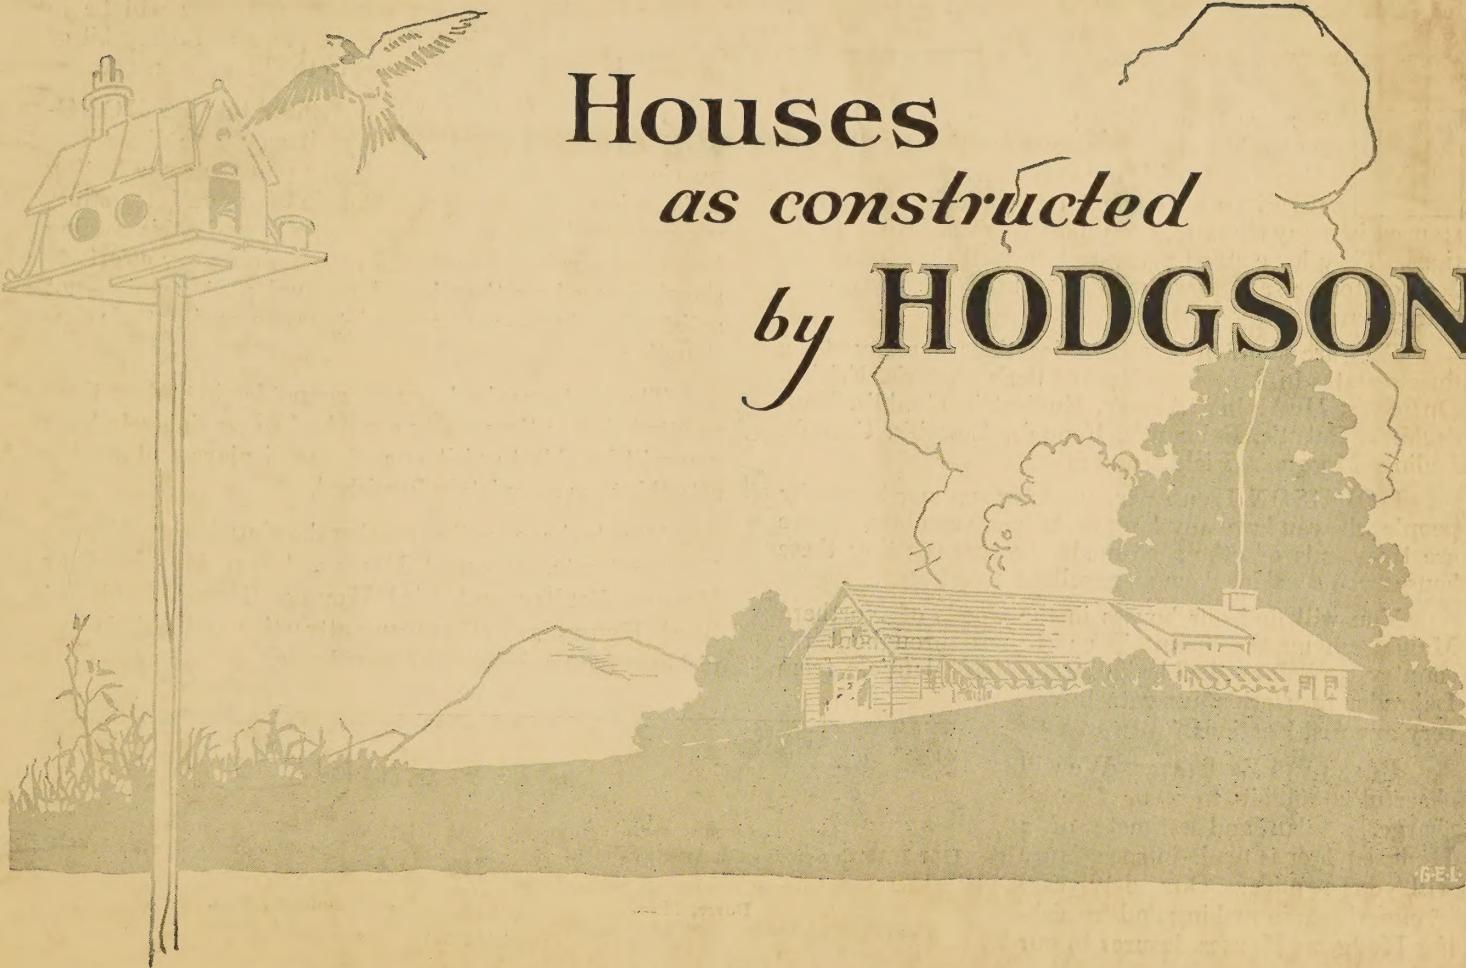

You will be well repaid by a visit to these showrooms, we are sure.

Houses *as constructed* by HODGSON

Interesting Facts

FOR more than thirty years the HODGSON Houses have held a unique position in all parts of the world, being used for many purposes. They have given enjoyment to people in all circumstances, in many climates, and under the most trying conditions. They have stood every test so well that today our best customers are those who have used the houses for many years.

They are found in prominent locations on many of the finest estates in America—Rockefeller's, Astor's, Frick's, DuPont's, McAlpin's, Ames's, Endicott's, Gould's, Vanderbilt's, Cabot's, Belmont's, Feno's, Lowell's, Crane's, Iselin's, Morgan's, Field's, and others.

HODGSON Houses are used for summer homes by people who can have anything that money can buy. There are thousands of others of moderate means using these houses who consider them an excellent investment.

You will find our houses in the woods of Northern Maine; among the mountainous regions throughout the country, and along the bleak coast of the Atlantic,—from Labrador to Florida, unprotected, in very exposed locations.

PLANS AND ESTIMATES. We will cheerfully submit to you, free of charge, a plan and estimate of a Hodgson House made in accordance with your own ideas. Our thirty years of experience in making and furnishing Hodgson Houses, insures to our

customers practical plans that show a great amount of thought and skill. Every window and door will be in just the right place and every bit of space used to the best advantage.

Read this catalog and be convinced that the HODGSON House is unusual and that it would be difficult to purchase anything that would give you the same lasting satisfaction. Believing you will find it more interesting, we are allowing our customers to tell you in this catalog how good our houses are, and are confining our efforts to showing you how they look by actual photographs—not artists' drawings—with a few details concerning their construction.

The photographs, however, cannot begin to show them as attractive as they really are. And so we sincerely hope you will be able to visit one of our displays and see the actual houses completely furnished.

We also have another catalog showing Arches, Fences, Garden Seats, Screened Houses, Lawn Houses, Play Houses, Poultry and Bird Houses, Kennels, and Pet Stock Houses, as well as many attractive and artistic furnishings for the interior of your home.

Where Hodgson Houses are made and Where to see them

In addition to the Exhibit pictured here, we have at Dover, Mass., in Hodgeport Lane, many of our cottages which are occupied throughout the year, making most comfortable homes. At the Factory grounds we have an exhibit similar to that at South Sudbury.

At 1108 and 1110 Commonwealth Ave., Boston, we have our main office and a large show room, showing an eight-room cottage attractively furnished, which will give prospective customers a good idea of our houses. Many of our small houses, garden and play houses, poultry houses, kennels, bird houses, etc., are on exhibition here.

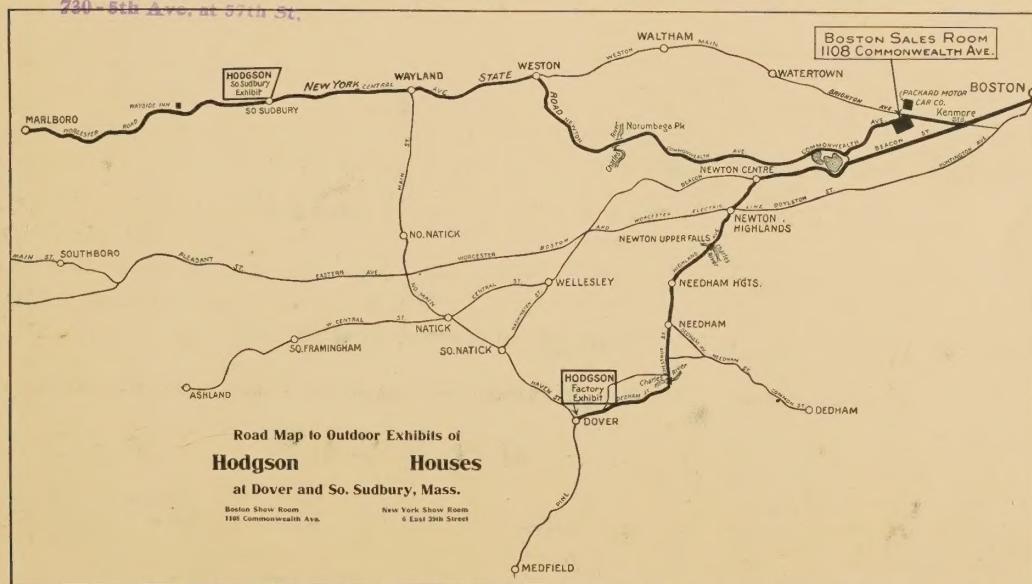

At 6 East 39th Street, New York City, near Fifth Ave., and only a

How To Find Us

THE map shows our Dover Factory and Exhibits, the South Sudbury Exhibit and our Boston Office and Show room.

At Sudbury, we are located on the State Road running from Boston to Worcester, Springfield and New York, one mile east of the historic Wayside Inn—now owned by Henry Ford.

Dover is a few miles off this road to the south. The towns surrounding Dover are: The Newtons, Needham, Dedham, Walpole, Medfield, Sherborn, Framingham, Natick and Wellesley.

Our New York Office and Show room is easily found, it being near the corner of Fifth Ave. and 39th Street (6 East 39th Street) and only a few minutes from the Grand Central Station.

We hope you will be able to visit at least one of these places and become acquainted with our houses, believing it will fully repay you.

THE BILTMORE, NEW YORK

John McEntee Bowman, President

PRIVATE OFFICE

E. F. Hodgson Co.,
1108 Commonwealth Avenue,
Boston.

Gentlemen—

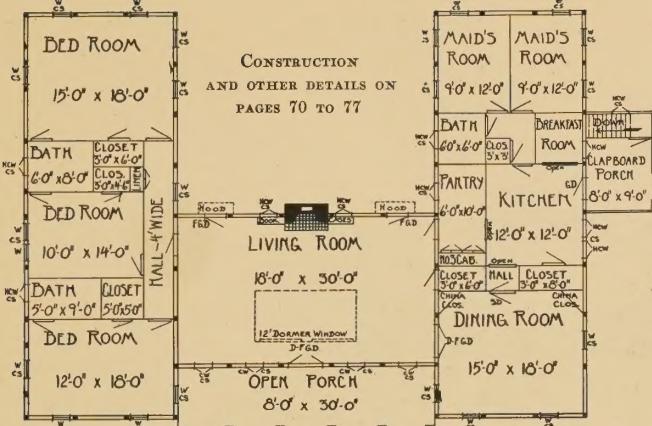

"I have often thought that the man who designed and developed the Hodgson House should be decorated as a special benefactor of mankind and had he lived in any other country but America, I believe he would have been."

"I have been using the Hodgson Houses for years, both in Maine and in Westchester County and each Spring I marvel how they have withstood the blasting winters they have gone through. Each one in particular seems to defy the elements and when you realize that both of these climates are very hard during the winter months, and that after many years not even a stain of melting snow has come through, you can realize how well they are constructed and put together."

"One house in particular has been used by me for over several years, part of that time as a playhouse for my little girl, but it became too small for her so I purchased a larger Hodgson House for her and turned the other one over for a tool house and there it will probably stay doing good service and no doubt outlast both the gardener and myself."

"I have also used these houses at Goldens Bridge and I am now erecting them at Stone Hedge. I do not know just how they were developed but I will say that they are the nearest thing to perfection in their line, or the nearest thing to 100 per cent plus that I know of."

Very truly yours,
JOHN MCENTEE BOWMAN.

"The houses that I have bought from you in the last few years have given perfect satisfaction. They are built of splendid material and are of strong construction, and stood winter snows and bad weather in a satisfactory manner, and are now as good as new."

OLIVER AMES,
96 Ames Building, Boston.

AT RYNESTEDE, OSSINING, NEW YORK.

"I enclose a little snap taken of the Hodgson cliff house from across the lake. Standing down at the right is the distinguished painter—August Franzea, who admires your house extravagantly, as do all our friends; and we never fail to boast the Hodgson product."

LOUIS K. ANSPACHER.

AT FALMOUTH (CAPE COD), MASS.

"Will you please send me one of your new catalogues? We are hoping within the next year or two to put an addition to our house, No. 2325, which we bought from you nine years ago."

"Our house is still as sound as the day we got it and we are very proud of it."

BORDEN, KENYON & HAWES, COUNSELORS AT LAW, FALL RIVER, MASS.

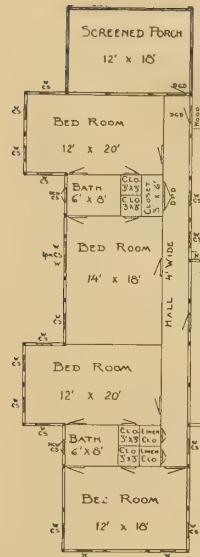

"After occupying this house from the middle of May to the middle of October for three successive seasons, I can state that it has been absolutely successful, and that its arrangements have been ideal. It has withstood many severe storms, particularly the great hurricane of August 26, 1924, when the sea repeatedly broke over the wall in front of the house and rolled underneath the house and burst open the dining room door, and flooded the room of which pictures are enclosed. After the storm subsided and we had dried things up, we found that there was not one single repair to be made to any part of the building."

"I am delighted with my house, as I wrote you long ago. I use it as a studio—it is right on the edge of a lake, quite smothered in trees and altogether it is a great success. At Nantucket

"I have your very kind note and hasten to tell you that the Hodgson house has not been sold, but is still in my possession. I have had many tenants in it, and use it myself when I can. It is a huge success. I may need two new rooms next spring and will come up to Dover or into your show rooms to talk with you about the best way to add them."

"I think my little "Fancy's Folly," as the cottage was called, has been a great advertisement for you, though you scarcely need it, do you?"

(Mrs. Philip) NANCE SALTONSTALL,
Dedham, Mass.

Owenoke Farm, Greenwich, Conn.

"Years ago I bought one of your Hodgson houses for my daughters, so that they might play house in a real little house. It has not only been a constant joy to the children, but a source of great comfort to the grown-ups, as there has never been the slightest need of repairing anything about the house. Through the worst storms of both winter and summer, it has never leaked, and it is in as perfect condition today as when we first set it up. The exterior, now, is very much prettier than it was, as the roses have climbed up to the roof, and form an archway over the porch. I will try to take another photograph when they are in bloom, and will send it to you next June. We feel that you deserve a vote of thanks from the entire family."

(Mrs. P. A.) ISABEL S. ROCKEFELLER.

Eighteen (18) years after the above mentioned cottage of three rooms was erected for Mrs. Rockefeller, she added additional units making it a nine (9) room Guest House; also erected another larger Hodgson house of several rooms.

Comfortable Summer and Winter

"I am glad to tell you that I have always found my Hodgson house satisfactory. Through the terrible heat of summer and the coldest weather of winter, I have found it successful. Several people have bought houses on account of seeing mine."

Miss M. B. FORBES,
Milton, Mass.

After Twenty Years

"I will write a few lines, saying how much I have enjoyed my house for twenty years, and will send you a picture in the near future. Glad to do it."

This summer we have come back to it and it will please you to learn that we find it in perfect condition, no leaks, no warping, everything snug and tight, as good as new. Two years ago we had the house oiled on the outside, but otherwise no special care has been taken of it. I am very much pleased and compliment you on your honest workmanship."

Ninety Mile Gale

SAKONNET, R. I.

"You probably will remember my remark to you when I purchased one of your attractive houses, and that was that I did not think it would stand a gale of wind.

"Allow me to say now that my place at Sakonnet stood one of the worst storms they say in thirty years. Fishermen say 85 to 90 miles an hour and rain that pelted like hail.

"The house never creaked or leaked a drop and I am more than satisfied with it."

L. W. McMaster.

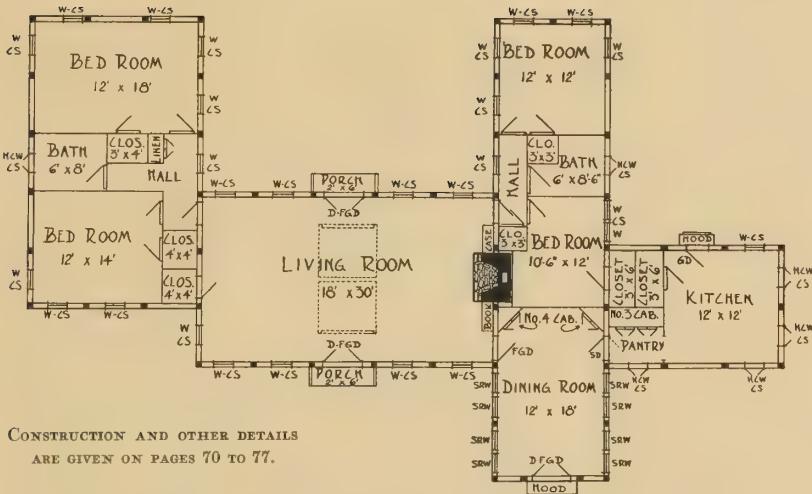

At Williamstown, Mass.

"In the Spring I bought a house from you, to be erected in Williamstown, Massachusetts. No transaction that I have ever had has been more satisfactory. Everything in the way of workmanship was of the highest grade; the house fitted together perfectly; the hardware was attractive; the doors had glass knobs; the dormer windows were provided with window cords; the clothes closets came with rods on which to hang garments. These are the little things which show the thought and care with which you worked out every detail."

OGUNQUIT, MAINE.

"I feel that I ought to say to you that I regard my Hodgson cottage as one of the best investments I have ever made. The little house is not only commodiously comfortable within, but pleasant to look upon from without, and has added several times its cost to the convenience of my household. Its immediate availability has saved me the cost and inconvenience of extensive alterations to my home, to say nothing of the avoidance of delays in construction. When a man can have a three-room extension made to his house in less than twenty-four hours, and accomplish it all without the noise and litter of actual building, he may account himself several times blessed—and that is my frame of mind, in sending you my check and my thanks."

JOHN KENDRICK BANGS.

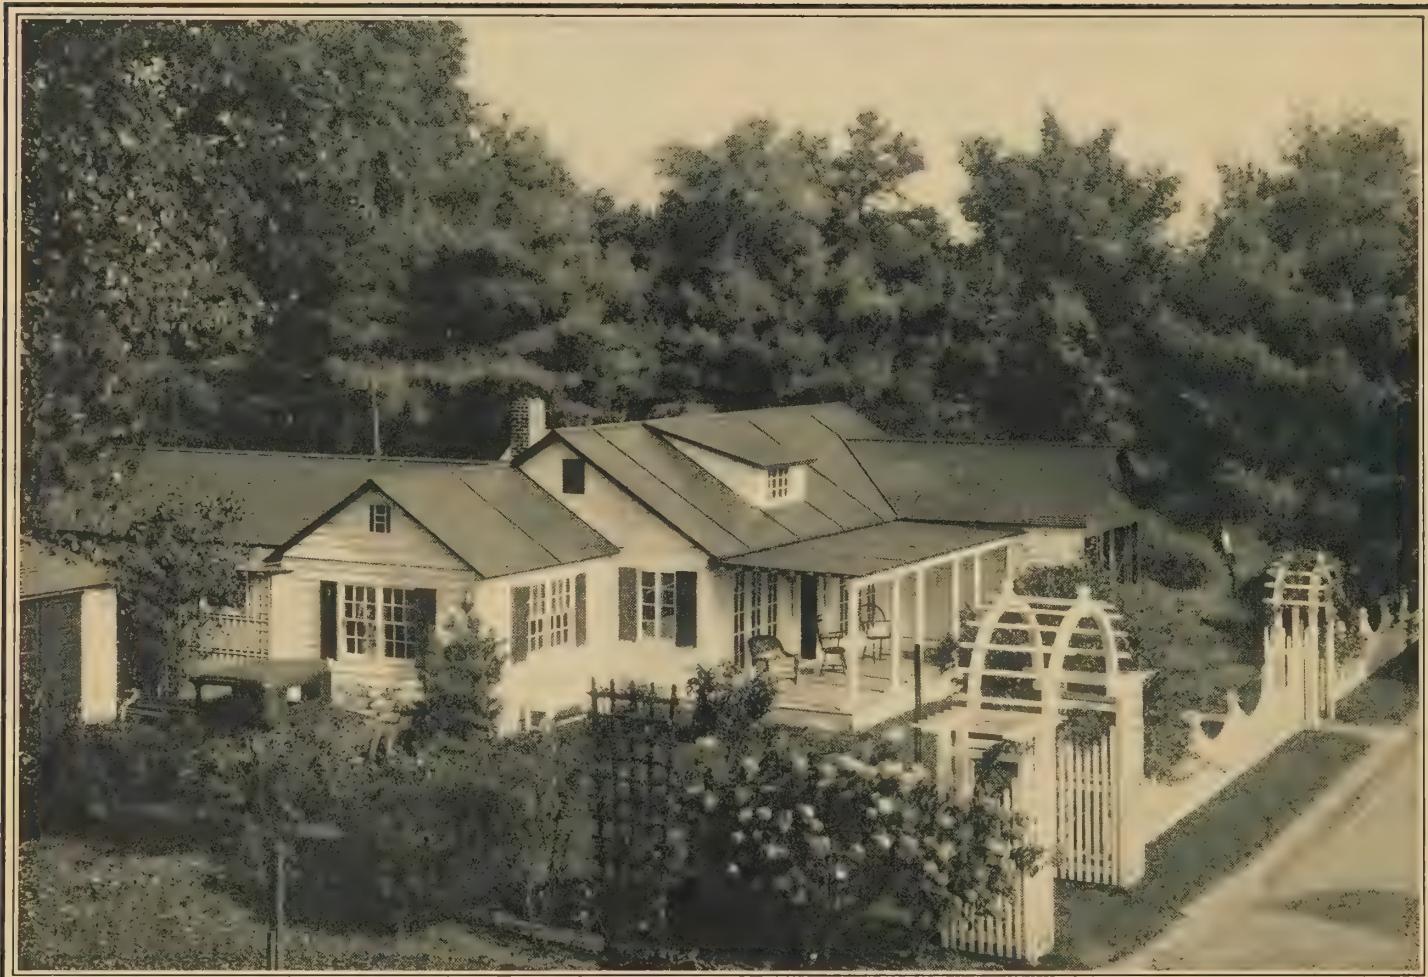

Perfect Condition After 20 Years

"Please send me your latest complete catalogue with latest prices of your houses, garages, arbors with seats, fences, etc.

"I have a Hodgson cottage bought of you over 20 years ago. It is still in fine condition. I have also two large poultry houses 20 years old or more.

"I have been very pleased with the buildings."

"Some day when you are in New York, I would like to take you up to see the cottage. I think you would be proud of it. All who have seen it state it is one of the finest little club houses they have ever been in. I shall always be glad to show any one you may send to see the house. It is one of the most restful places you could sit in. I go down there—in fact, the family do—night after night and sit around and play music in preference to sitting up at the house.

Hurricane of September, 1926

"The Hodgson Cottage erected by you for me on Bradenton Beach, Gulf of Mexico, went through the terrible hurricane of September 17th and 18th without any damage of any kind. This is remarkable when I relate that cement and brick business places on the beach were seriously damaged, the bricks or blocks being blown out of their places."

"The cottage was not damaged in the least, nothing in it was hurt, and the clothing and beds and all furniture were entirely dry on the afternoon of the 18th, indicating that water had not leaked in."

"I know of no more severe test that a structure could be put to than this hurricane, the worst in the history of this State or perhaps of the South, and this cottage was entirely exposed without any wind breaks, or any other buildings near it to protect or shield it."

Hodgson Cottage on the Canadian Boundary, St. Louis Co., Minn.

In St. Louis County, Minn., on International Boundary

"The Hodgson House which I erected gave me a great deal of pleasure and satisfaction last summer. It was up to my expectations in every way and my only regret is that for business reasons I cannot use the house the year around, instead of only four months out of the year."

"A Heatilator unit was installed in the fireplace of my Hodgson House and is very satisfactory. In fact, I was very much surprised at the amount of additional heat which this unit will give out. I used wood entirely and in freezing weather found that it would heat my living room very comfortably."

W. P. INGERSOLL,
Canton, Illinois.

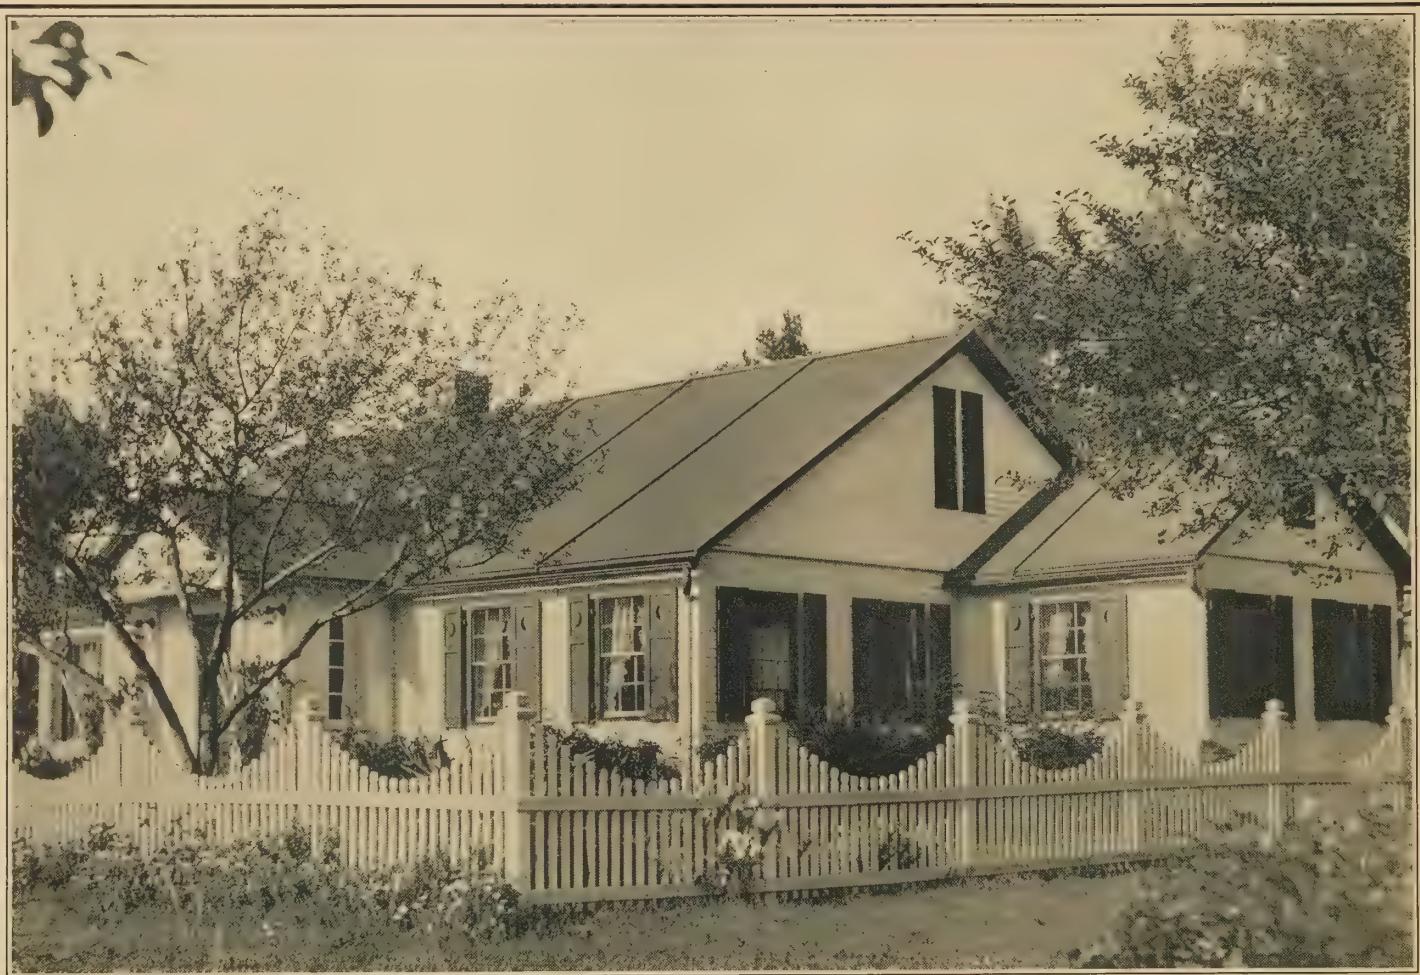

NOTE: The Heatilator is shown on page 72.

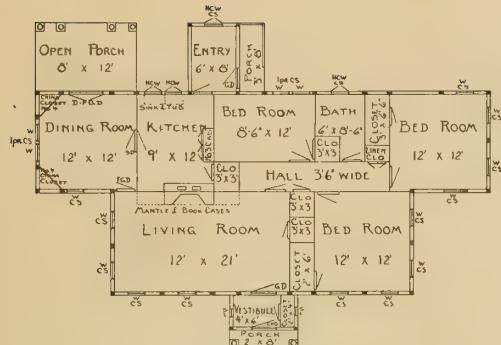

In the Florida Hurricane—Fall of 1926

"The house which I purchased from you and erected on my property at Palm Beach, Florida, is very satisfactory. As you no doubt know, we had two very severe rain and wind storms at Palm Beach. The house has survived both storms with practically little damage. With the exception of some water leaking in around the windows, the house is in excellent condition. This is by far more than I can say for nine-tenths of the houses built in Palm Beach."

After 16 Years

"Please send me if you will, three more copies of your little illustrated booklet, one of which came to me last week, with reference to the portable houses.

"I was interested to see that you still carry my letter to you written from Messina after the Messina earthquake in 1909, where as Relief Commissioner from Massachusetts I used a number of your cottages.

"It may interest you to know that a friend of mine, who visited Sicily last year, told me that some of your portable houses, possibly all of them, were still up and in use."

EDMUND BILLINGS, Boston, Mass.

After Sixteen Years In Use

"In the spring of 1907, my father, the late Rev. Alex H. Young, of Matawan, N. J., purchased from you a portable house of three rooms, an ell, a front porch with hip roof and a side porch with awning. This house was put up near Andover, N. J., on the shore of Slater's Lake, and is still in excellent condition.

"We would like to add a living room of good size (18 x 24 ft. or even larger). Will you let me know if you have large sections, and suggestions for using them in connection with the house we have?"

DR. HARVEY W. YOUNG,
Red Bank, N. J.

Perfect After Eleven Years in Northern New Hampshire

"Will you please advise me as to the correct method of taking down one of your cottages which I purchased of you eleven years ago, and which has braved the climate of Northern New Hampshire, with no further attention, all these years, than a new coat of paint on the roof. It really is a most remarkable piece of ingenious workmanship, and I congratulate you.

"Now I wish to remove it to another location."

The Phillips Properties

1218 CONNECTICUT AVENUE, WASHINGTON, D. C.

"After erecting one of the cottages and almost completing the erection of the second at Ebensburg, Pa., a very severe storm in Ohio swept over the western part of Pennsylvania. It was one of the worst storms I have ever seen in that part of the country. Trees were blown down; telephone and electric light wires were destroyed and portions of the electric light plant in the village were temporarily out of commission. Both the completed and the uncompleted cottages stood the storm splendidly. The roof of the uncompleted cottage had not been bolted together; yet there was not enough water leaked through the roof to fill a good sized coffee cup. Mr. and Mrs. Phillips are very much pleased with the service that these cottages have rendered. They have caused considerable comment in Cambria County, and so far as we know there has been not an unfavorable expression from anybody. If you care to refer any prospective customer to us for an expression of our experience, we will be glad to speak in this way regarding our transactions with you."

DWIGHT CLARK.

International Grenfell Association

INDIAN HARBOR, LABRADOR.

"I am not in the habit of writing testimonials, but the cottage which you sold me six years ago, has stood rather an exceptional test, I imagine, and it seems only fair to acknowledge it.

"It stands on a little rocky eminence about 120 feet above the harbor level. The site was chosen because of the superb view of the harbor and bay rather than for shelter, and a good deal of risk to the building was thereby involved.

"The strength and endurance of so light a building is really amazing. While we only reside in it some four months each year, as our winter headquarters are 140 miles up the bay, it has always been a real pleasure to come back to it and a certain amount of initial trepidation, when the full fury of a storm was felt, has given way to a confidence arising from the conviction that no harder test is possible than some of those experiences during the last six years."

(Dr.) H. L. PADDON.

Cottage and Swimming Pool on Lake Michigan

Erwin C. Uihlein, Milwaukee

"I have kept my place open the year around, installing an Arcola system, and have had every comfort and convenience; in fact, have had no difficulty in keeping the house comfortably heated at ten below zero.

"The primary object in having a place of this sort is that one can go there over the week-end or during the week for some real exercise and relaxation.

"The property is eighteen miles from my office and the roads are good, so I can make the run in thirty or thirty-five minutes with ease. It is also sufficiently off the beaten path to assure one real privacy.

"As Roosevelt often said, 'To be fit mentally one must be fit physically.' The little place is serving the latter purpose."

"Enclosed please find photograph of the Hodgson house purchased some years ago, located on our property in McIntosh County, Georgia, near Townsend. From all accounts it is still living up to its reputation for standing the elements. It was in the line of that Florida hurricane, and while trees fell all around it, the cottage showed no effects. Don't believe any other make would have stood that test."

It was very easily put up and has withstood several rather severe storms, although it is in an exposed position on the top of a one hundred foot hill. We passed through the tail-end of the hurricane which recently hit the south, without even a window rattling."

Hodgson Cottage at Wingaersheek Beach, Sand Dunes of Cape Ann, Mass.

At Moosehead Lake, Maine, for 12 Years

"I am very familiar with your houses, as I purchased four some ten or twelve years ago, and I am using them as a camp near Moosehead Lake in Maine. Some two years ago I was obliged to move my camp on account of the construction of a dam, which, when the basin was filled would drown me out, so I moved my camp down some five miles from the old location. This was done without marring the sections to any extent, and they were re-erected and now look as good as new."

"I want to let you know how much I appreciate the quality of the paint used on them, as during all this time only the roof has been repainted until this summer."

GEORGE R. WALLACE,

"It is impossible to speak too highly of our Hodgson cottage. Every one who has visited it considers it most attractive. Our pleasure began with its selection at Sudbury when you gave us so much of your time and so many valuable suggestions. Since then this pleasure has continued, and why should it not? 'A thing of beauty is a joy forever.' This summer has given a severe weather test. Torrential rains and terrible wind storms have made no impression upon it and not a single leak has appeared anywhere. We are looking forward to many years of enjoyment in this house."

At Katonah, New York

Cabana No. 3029—12 x 24 ft., Price \$990.00

Cabana No. 3030 for the Beach

This Cabana is intended for the beach where several are generally used, placing them close together as at Miami Beach, Florida. The construction is different from the usual Hodgson House, the sides being made of matched sheathing with battens to panel the sides. There are two compartments as shown by the plan, although they can be made with one compartment if so desired. When a number are placed close together, as is usually the case, a continuous platform can be made to set them on; this platform forming the floor to the Cabana and porch. For this reason we are quoting prices with and without floors, awnings, etc.

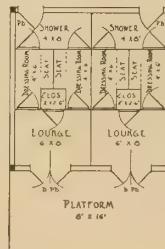

This Cabana is 16 x 16 ft., divided into two entirely separate parts by a solid partition from floor to ridge of roof, making two compartments each 8 x 16 ft., each divided into rooms as shown by the plan.

Colors—We can paint our Cabanas our usual white with Colonial green roof; or Florida colors—nile green sides, orange roof, and trimmings of azure blue. These colors are very striking and attractive on the beach.

PRICES:

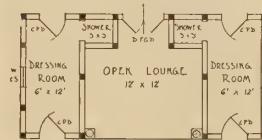

Building as shown by plan, without floor	\$678.00
Floor and Porch platform (16 x 24 ft.)	96.00
Spearhead awning	66.00
	\$840.00

Cold water shower fixture, without tray, \$12.00 each

Hodgson Cabana No. 3029 for the Swimming Pool or Private Beach

This Cabana is 12 x 24 ft., divided into two dressing rooms, two showers and a lounge. The lounge is open across the front, affording a protected view of the pool or beach. The showers are fitted with two metal trays or basins and a cold water shower. The building is constructed on the Hodgson unit system and can be added to at any time. Read Pages 70 to 77, giving all details of construction.

The prices are as follows:

Building as shown by plan	\$920.00
Two sets shower bath fixtures	40.00
Spearhead awnings as shown	30.00
	\$990.00

Cabana No. 3030—16 x 16 ft., Porch 8 x 16 ft., Price \$840.00

Hodgson Camp Houses No. 3031

THESE camps are made in 6 x 12 ft., units similar to our cottages. The partitions are canvas curtains to slide on wires. The curtains are all 6 x 7 ft., and as many as desired can be used. All curtains are the height of the side walls. Each house has a few lights of glass in addition to the canvas shutters giving plenty of light inside when the shutters are closed.

They have screened openings, the openings being protected by canvas covered frames that are adjustable from the inside, and held at any point from wide open to closed tight and fastened. The roofs and sides are of cedar, and the floors hard pine. Outside panel doors with mortised locks and brass hardware are used. The exterior is treated on the sides with Cabot's brown stain, and the roofs a moss green.

They are very durable and can be left standing throughout the year without the slightest danger from heavy snow storms.

No. 3031, Plan B—is 12 x 18 ft. It has 3 curtains to form 3 rooms. Price \$413.00.

No. 3031, Plan D—is 12 x 30 ft. It has 6 curtains to form 5 rooms. Price \$632.00. Curtains are figured at \$7.50 each. If not wanted deduct this amount.

A smaller camp house is shown on page 64.

**Pool or Sand Box
3 x 3 ft. No. 3032**

THIS pool or sand box is strongly made of enduring cedar, and is lined with galvanized iron so that water can be used in place of sand, which affords fully as much pleasure to the "kiddies" and is much easier obtained. All the woodwork is attractively painted white and green and the "Troy" sunshade is of the same colors. The wide top edge furnishes a comfortable seating place while at play.

Price complete as shown, \$28.00
Price without sunshade, \$18.00.

Screened Play House No. 3033

Just the place for the baby or small children, away from the insects and hot sun. Made of cedar with a hard pine floor and copper screens. Very attractively painted. Can be set up in an hour's time.
Price \$90.00.

Hodgson Play or Camp House No. 3034

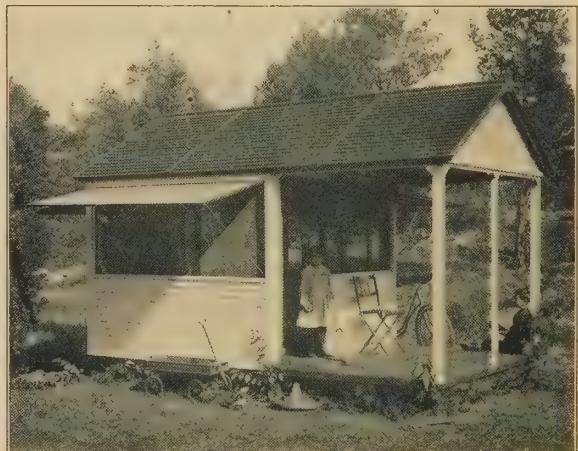

THIS house has screened openings, the openings being protected by canvas covered frames that are adjustable from the inside, and held at any point from wide open to closed tight and fastened. The roofs and sides are of cedar, and the floors hard pine. Outside panel doors with mortised locks and brass hardware are used. The exterior is treated on the sides with Cabot's brown stain, and the roofs a moss green.

It is very durable and can be left standing throughout the year without the slightest danger from heavy snow storms.

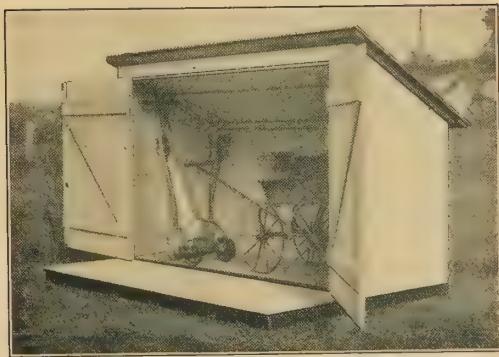

It also makes a very desirable camp house and is very quickly set up. See page 63.

"The cottage, with its kitchen annex, I purchased for the pleasure of our daughter, Francis Nevin, in order that she might use it not only to entertain her young friends in the experimental cooking stages, but also to have the benefit of the cottage as a quiet place for study. It has met its requirements admirably.

"We introduced electric lights and, when the kitchen was added, put in running water. Having electricity we have an electric stove for heating, and another for cooking, and are thus able to turn the building into a very comfortable little cottage, it being in close proximity to the big house.

"Back of the cottage, since we purchased it, we have a tennis court, and we are thus able to use the cottage as a club house for keeping rackets, balls, tennis nets, etc. In addition to this we have a radio outfit and this enables the younger members of the household to have the entertainment of broadcasting without its being connected with the main house.

"I think your building is very attractive, and is certainly complete in all details."

W.M. L. NEVIN.

COHASSET, MASS.

"I can imagine nothing which could give the children more satisfaction and delight than their house has done. It means so much to them to have their own real house in which they cook real meals for themselves on a real stove, and in which they can even sleep at night. Around the house they have their own flower garden, and a vegetable garden. When we are in the city they are constantly on the lookout for something more for furnishing or decorating the house. It is really wonderful the way it stands the weather; it seems just as bright and tight today as the day it was set up."

Your Questions Answered

ARE HODGSON HOUSES PRACTICAL?

Thousands of people in every climate of the globe, under all sorts of conditions, are today living, sleeping, playing, working, in Hodgson Houses. Over thirty years' experience, the latest machinery, trained workmen, and perfect materials, are bent to the task of making Hodgson Houses the most efficient and economical that human skill can produce.

DO THEY LOOK ATTRACTIVE?

Attractive enough to be erected without changes on many of the finest estates in America, adjacent to costly mansions. Hodgson Houses have won special praise for their harmonious lines, neatness and good taste.

ARE THEY DURABLE?

Orders are constantly coming in for additions to Hodgson Houses purchased ten, fifteen, twenty and more years ago, and in constant use since. Hodgson Houses stand up without repairs for years. They are built of enduring materials and built right. The enthusiastic testimony of actual users is the best proof of these claims. (See letters printed in this catalog.)

WHAT ARE THEY MADE OF?

Rather than use a heavy cheap lumber (similar to carpenter construction) that is expensive to ship and erect, less artistic and less durable, and put together in a way that leaves much for the purchaser to do and requires a continual expense to keep in repair, we use for a frame, clear, strong, Oregon pine, covered with enduring cedar (walls and roofs) backed with a heavy fibre lining, making a strong, durable, and absolutely weatherproof building, requiring few repairs, with a roof guaranteed to stay tight for years, inexpensive to ship and easily erected by unskilled labor. The floors are of rift Oregon pine.

HOW DOES CEDAR COMPARE WITH OTHER WOODS?

Woods differ in their characteristics, many of them being very short lived if exposed to outside elements. Cedar, which is the entire outside covering of the Hodgson Houses, is a wood that neither shrinks nor swells. It is distinguished by its resistance to decay. Since the days of the famous "Cedars of Lebanon," its enduring qualities have been well known—and it is often called "The Wood of the Ages." Trees from which this cedar is made have grown on the mountain sides of the Northwest for centuries. Fallen cedars lie on the mountain sides for centuries and still remain perfectly sound. According to government tests there is no wood of commercial value that exceeds cedar in endurance.

The fragrance of cedar is very pleasing to persons but it cannot be endured by insects. It is free from sap and is very slow burning. It is very light in weight compared with other wood and saves freight costs. No wood holds paint better. After 30 years' experience with cedar we do not know of any wood better suited for our purpose.

HOW ARE THEY MADE?

In sections, each section with windows and doors fitted in place and with all hardware attached; nothing left for you to do but set up these sections, and drive in wedge keybolts with a hammer—quickly done, no skill required, and when put together are as rigid as a permanent building.

WHAT IS THE OUTSIDE FINISH?

Hodgson Houses may be had in either our narrow or wide Colonial Siding. The wide siding is 8" wide; the narrow 4" wide. Both of these sidings are shown in pictures throughout the catalog. The prices quoted are for the narrow siding with the additional cost if wide siding is wanted.

ARE THE HOUSES PAINTED?

Yes, with the very best lead and oil paints obtainable. The first coat is a dipping coat, thoroughly waterproofing every part of the entire covering of cedar used in our houses. After this two more coats are applied by brush.

Our stock colors are white sides with Colonial green roof, blinds and doors. If other colors are desired there is a slight additional charge.

WHAT ARE THE SINGLE AND DOUBLE WALL CONSTRUCTIONS?

The *Fibre Lined single wall* construction shows the frame of the building on the interior with a background of the heavy tan colored rope fibre lining. With this construction the partitions are made of Oregon sheathing.

The *Arctic Lined double wall* construction is the same as the single wall with the addition of the Arctic boarding covering the inside frame, forming a dead air space between the inside and outside walls. When a house is termed Arctic (Celotex) Lined, it means that the side walls, the roofs and the floors are lined with Arctic board, and that the partitions are made double of it—a construction more comfortable than a well built plastered house.

WHAT IS ARCTIC BOARDING?

It is a cane fibre board, $\frac{1}{2}$ " thick, commercially known as Celotex, and we believe it to be the best insulator of heat, cold, and sound yet produced.

WHAT IS THE INSIDE FINISH?

The interior woodwork of the single wall house is stained a walnut brown. This with the background of the tan fibre lining makes an attractive, neat and sanitary finish for summer use.

When the houses are Arctic lined, the woodwork and the strips over the Arctic boarding, as shown in several of the interior pictures in this catalog, are stained a walnut brown—a very attractive contrast with the cane colored Arctic lining, taking away the plain effect from the walls. These strips, however, may be eliminated and a single strip only used every six feet apart, which is the width of the Arctic board. If you do not care for the walnut brown finish on our woodwork, we can leave the wood unstained for your own decoration.

DO THE HOUSES HAVE CEILINGS?

Yes, if wanted. Some prefer all rooms open into the roof, which gives a more airy and lofty appearance. Without ceilings all rooms have partition peaks, entirely separating the rooms, ceilings being over only baths, closets, etc. All ceilings are made of Arctic boarding laid in panels on ceiling beams.

Your Questions Answered

ARE THEY COMFORTABLE WINTER AND SUMMER?

For summer, or eight months in the year, our fibre lined single wall houses have been used for many years with wonderful success; but for very cold weather or hot climates we recommend our double walled Arctic lined houses for protection against excessive heat and extreme cold. At Dover we have an attractive wooded park of several acres on which are erected many of our Arctic lined houses, having cellars, with furnaces, plumbing, electric lights, in fact, everything for the comfort of the tenants for use the year around. These houses heat much easier than a carpenter built house and are so comfortable and attractive that we have a long waiting list of tenants for them.

WHAT ARE THEY USED FOR?

For seaside and mountain summer homes, country homes, guest houses, overflow houses, studios, sun parlors, summer and winter camps, play houses, boys' and girls' camps, schools, churches, club houses, hospitals, and innumerable other purposes. Many are used as home on large estates while building operations are going on or after a fire.

ARE HODGSON HOUSES PROOF AGAINST HEAVY RAIN, SNOW AND WIND STORMS, HEAT AND SEVERE COLD?

This question is answered many times throughout this catalog by letters from many of the best known people in this country. Hodgson Houses have stood on bleak islands and on the most exposed parts of the Atlantic Coast, as well as being buried in snow in Northern Maine and Labrador. After eight years' use in Labrador another Hodgson House of several rooms was sent there. Yet they are used in hottest Africa in the mahogany lumber camps.

WHAT IS THE FOUNDATION?

A wood post foundation lasts for many years if chestnut, cedar, locust or cypress is used, and makes a good, reasonable priced foundation, if well set. Naturally cement or brick piers are more lasting; sometimes it is wise to put the house on a wall foundation. If the house is used the year round a cellar under at least part of it, and a heater, insure comfort. We do not furnish the foundation unless an extra charge is made for same. We do, however, furnish a plan.

DOES A HODGSON HOUSE REQUIRE A BUILDER OR CARPENTER TO ERECT IT?

No, one mechanic and a couple of "handy men," following our very simple directions, can easily set up a Hodgson House with no other tools than a screwdriver and a hammer to wedge in the keybolts, which interlock the sections and hold them rigid against the severest strain.

HOW LONG DOES IT TAKE TO SET THEM UP?

The smaller Hodgson Houses can be erected in a day, and the larger houses in four or more days. It is safe to say that no house could be erected in less time than the Hodgson, or require less skill.

CAN THE HODGSON CO. ERECT A HOUSE FOR ME?

Yes, we do this in two ways. We will quote a price delivered and erected, taking care of all expenses; or we can furnish a working foreman and he or you can hire local help to assist him. For our man's services we charge per hour and his expenses. This is the cheaper way as by hiring local help carfares and living expenses for helpers are eliminated.

WHAT ARE THE ADVANTAGES OF A HODGSON HOUSE AS COMPARED WITH BUILDING IN THE USUAL WAY?

The saving in time, trouble, and money is very substantial; your house is ready in a few days instead of a few months, and you do not have to worry about plans, construction, materials, labor, and supervision, not to mention "extras." The real money saving to a busy man is thus even greater than the cost figures would show. Moreover, the house is more salable because movable, or you can move it yourself to other locations. It can, therefore, be erected on leased land. It can be easily enlarged at any time, and a great deal of our business each year is making these additional units. The houses have a charm and an attraction inside and out that a carpenter built house cannot have except at a far greater cost. It is this feature in a Hodgson House that will appeal to you more than any other after you have seen or used one.

HOW ABOUT PLUMBING AND HEATING?

Hodgson Houses can be heated and plumbed the same as any house. There are many types of heating appliances, some requiring cellars—others which do not. Metal or brick chimneys with portable or brick fireplaces are nearly always used. We furnish, when desired, at extra cost, all plumbing fixtures necessary for any house. These fixtures are described on Page 72.

ARE THE HOUSES SCREENED?

Our houses can be screened to make them absolutely fly and mosquito proof. We use very fine copper netting. The cost to screen any of our houses or porches is given on Pages 74 to 76.

HOW IS A HODGSON HOUSE SHIPPED?

Compactly, in sections, by second-class freight, put in the cars at Dover, Mass., on the N. Y., N. H. & H. R. R. Or we can quote trucking price delivered on your grounds.

HOW ARE THE HOUSES FURNISHED?

We publish a booklet showing furnishings. You should have a copy. Many of the interior and exterior furnishings shown in the pictures in this catalog were furnished by us.

WHAT ARE THE TERMS OF PAYMENT?

The prices listed in the catalog are absolutely net. A deposit of 25% is required with all orders when placed. The balance may be paid prior to shipment, sight draft attached to bill of lading, or if satisfactory references are given, the balance may be paid after goods are received.

Corner China Closet No. 4

Height 7 ft. 6 in. Width 3 ft. Made of cedar with walnut finish.

Price, \$40.00.

Refrigerator

THE houses shown in this catalog are made up of units that are 6 ft. long by either 12 ft., 18 ft., or 24 ft. wide. Any number of these units can be put together to form a house of the desired size and plan. In this manner you can plan a house to meet your present needs and it can be easily added to later to enlarge it.

This drawing shows the six foot units, also a hip and gable end, with a valley roof used to turn the units at right angles. With this combination of units it is possible to make a straight line house; turn the units at right angles to form an L or H shape house; in fact almost any shape you desire.

The width of the house can be 12 ft., 18 ft. or 24 ft. and the length as long as desired in multiples of six feet. You can have hip or gable ends, porches, ell's and many different styles of entrances as shown on the following pages.

The prices of these unit parts are given on this page and to these prices should be added the prices of all doors, windows, etc., that are desired.

Hodgson Unit System

	6 x 12 ft.	6 x 18 ft.	6 x 24 ft.
Units	\$110.00	\$145.00	\$187.00

Screening Porches

(Copper Netting)

Any of these style porches can be screened. We use a fine mesh copper netting, re-enforced for about 3 ft. up with a heavy netting. The screen frames are of cedar and well painted.

Screening Clapboarded Porches, including one screen door, is figured at the rate of \$2.00 per lineal foot.

Screening Open Porches, \$3.00 per lineal foot.

For Trellises, Flower Boxes, and In and Outdoor Furnishings, see our "Furnishing Booklet" E30.

☛ Style F & G—Entrance Porches

These Entrance Porches are made in three sizes, 2 x 6 ft., 4 x 6 ft. and 6 x 6 ft. The only difference in style is that one porch has a panel of lattice on each side (like picture) while the other has Colonial columns without the lattice panels. The prices are the same for either style.
